WHAT THIS IS

Who pays for public schools.

Public schools are funded by three levels of government — **federal, state, and local** — but the mix varies enormously by state. This reference gives **every state its own page** showing exactly how its school revenue splits across the three sources.

Federal **State** **Local**

A THREE-WAY SPLIT

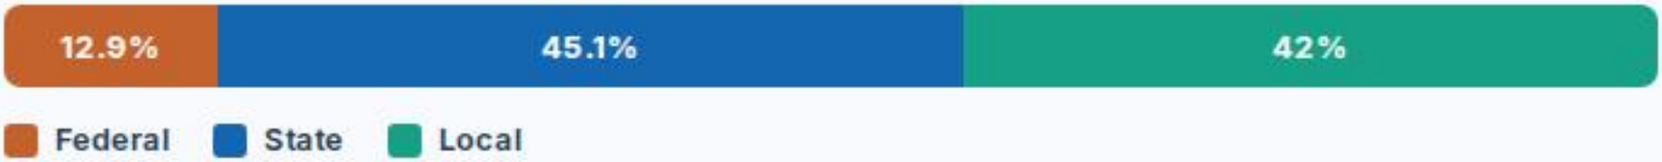

Nationally, schools drew **12.9% federal**, **45.1% state**, and **42% local** revenue in 2022–23. But **local** reliance (mostly property taxes) tops 55% in states like Connecticut and New Hampshire, while **state** funding exceeds 85% in Hawaii and Vermont. The **federal** share — elevated here by pandemic ESSER relief — ranges from under 8% to over 23%.

ON EACH PAGE

- **The funding split** — federal / state / local share of total revenue
- **Total revenue** — all K-12 revenue, 2022–23
- **Who dominates** — which source carries the heaviest load

Source. U.S. Dept of Education, NCES, Common Core of Data, National Public Education Financial Survey, **2022–23** (Digest 2025, Table 235.20). Federal share includes COVID-19 relief funds still being drawn down.
